

Senior Data Scientist | Certified AWS Solution Architect

KEY COMPETENCIES

Development Tools

Python	★★★★★
Spark	★★★★★
SQL	★★★★★
NoSQL	★★★★★
Fast API	★★★★★
Django	★★★★★
GIT	★★★★★
GraphQL	★★★

AI/ML Frameworks & Tools

LangChain, OpenAI, n8n, CrewAI, AutoGen, RAG, TensorFlow, Keras, PyTorch, CUDA, OpenCV, NLP, YOLO, Bedrock, SageMaker, Azure ML, Scikit-learn, Statistics

Databases & Vector Stores

MongoDB, Milvus, Pinecone, Weavite, Qdrant, PostgreSQL

Cloud

AWS, Azure, GCP

MLOps & Visualization

MLflow, Weights & Biases, ClearML, vLLM, Git, CI/CD, Jenkins, Docker, Kubernetes, Airflow, Kafka, Elasticsearch, Kibana, Prometheus, Grafana, Tableau, QlikSense, Streamlit

Languages

		
English	French	Tamil

EDUCATION

2018 - 2021

Master in Big Data & Data Science, CY Tech- Ecole d'Ingénieurs, Cergy, France

2010 - 2012

Master in Embedded system design, Bharath university, Chennai, India

2006 - 2008

Bachelor in Electronics & communication system, Anna university, Chennai, India

PROFILE

Senior AI/ML Scientist specializing in LLM orchestration (RAG, multi-agent systems) and high-performance Computer Vision. I architect and scale robust, human-centered AI solutions by bridging the gap between innovative AI development and practical, scalable engineering.

EXPERIENCES

Senior Data Scientist, Valopt

Lead AI products design, development and implementation Sept 2022 - Present, FR

- Designed, developed enterprise chatbot applications with Agentic AI framework.
- Developed end-to-end No-code AI platform that automates full ML lifecycle enabling business teams to productionize AI solutions without coding.
- Built real time ML pipelines in spark & python using first-party cookies to enable personalized recommendations.
- Created LTV (life time value) prediction models and Spark-based streaming pipelines for real-time user segmentation and retention.
- Tools:** OpenAI, LangChain, Azure, AWS, Pyspark, Python, Rest Framework, MongoDB, Structured streaming

AI Engineer, JooVence

Build & deploy scalable AI Models for health care

May 2021 - Aug 2022, FR

- Built and deployed face anonymization algorithms, compliant with EU AI Act.
- Implemented models for image annotation to eliminate manual labeling.
- Developed predictive models to identify leads for cosmetic treatments.
- Enhanced model accuracy and fairness by fixing data quality and bias issues.
- Algorithms :** CNN, GAN, Yolo, Auto Encoder, TSNE
- Tools:** TensorFlow/Keras, Aws Sage maker, S3, OpenCV, Python, FastAI

Data Scientist, Sensego

AI marketing, Ad revenue and Click rate optimization

May 2020 - Nov 2020, FR

- Build predictive models for AI application (Adster) to manage ads.
- Segmented customers using clustering methods to target audiences.
- Created first touch attribution model, API endpoints and performed AB testing.
- Created client specific detailed metrics using Facebook business manager SDK
- Algorithms :** Xgboost, Ensemble techniques, Unsupervised algorithms.
- Tools:** Python, Sklearn, Pytest, FastAPI, Aws, Mongodb, Facebook business SDK

Instructor, Arbaminch University

Research Guidance & Academic mentorship

Oct 2012 - Sep 2018, ET

- Delivered courses & programming languages, mentored 1500+ students.
- Coordinated Govt sponsored research project as developer.
- Authored & peer reviewed academic research papers.

RESEARCH PUBLICATIONS & LIBRARIES

- Publication:** NLP based Fraud detection in internal audit documents.
- Publication:** Multiprocessor & solid state scheduling optimization
- PyPi - Deep Ensemble:** Wrapper for deep learning ensemble techniques.
- PyPi - Data-cleaning:** Cleans dataset and return as cleaned data frame
